

## **WHY RENT A RACE CAR?**

Well, it's a lot of fun!! This aside, your reasons may be as varied as the race cars we offer for rent.

- You want to maximize your track time with a second car
- Your favorite race car is not going to be ready.
- You're getting your feet wet and want to test, not invest.
- Variety is the spice of life and you're ready to try a new piece of machinery.

## **THE CARS**

We offer a wide selection of properly prepared, competitive, currently campaigned vintage race cars available for rent to qualified drivers.

## **THE DEAL**

The basic rules are simple.

- Your rental fee gets you the car for up to 1.25 hours on track each day for the day(s) contracted.
- Rental rates include your pit crew, tent space, basic hospitality related support costs.
- Rental rates do not include consumables (tires, fuel, fluids and the like).
- Rental rates do not include shared expenses such as catering, crew travel and accommodations. These charges will be assessed separately and invoiced following the event.
- Additional track time for any one day is available at a reduced rate as indicated on a per hour or fraction thereof basis.
- If a session is cancelled by organizers or you opt not to go out, your unused time can be applied to another track session during the rental period contracted.
- Minimum vehicle usage/cost is .6 hour per event day contracted unless the organizers cancel your sessions or the car is being serviced to correct a non-driver related problem.
- These rates do not include transport of the car /crew to and from the event, out of pocket costs for crew lodging, tires, fuel and of course any damage you do.
- Rates do not include enduro races unless the enduro is exchanged for alternate sessions such that the total track time for the rental period stays within the 1.25 hour per day rate limit. Additional track time for enduro races will be invoiced as detailed previously.
- Events are rain or shine. The rental race car and support services are yours for the time contracted whether you crash, damage the vehicle mechanically (normal wear and unforeseeable component failure excepted) or fail to complete the entire event for any reason.
- Damage and any other cost associated with use are the renter's responsibility with the exception of normal wear and tear.
- We reserve the right to reject any driver for any reason or cancel this contract at any time should we deem a given driver's conduct or skill unsuitable for racing.

## **DRIVER TRAINING & DEVELOPMENT**

Rates vary with consideration of instructor(s), location, vehicle specification, and duration of training/coaching sessions. Training is tailored to your requirements.

#### NOTES:

1. All vehicles subject to availability.
2. Rental customers are responsible for all collision and mechanical damage (normal wear excepted).
3. Insurance of any kind is not included with any rental. Insurance may be purchased separately from specialty providers.
4. Rates do not include VRS support costs, transportation, fuel, or tires. We invoice these costs & pro rata tire wear in your post race support invoice.
6. Rental vehicles are "Your Property" for the term rented. They are race cars not appliances! You are financially responsible for rental & support costs without consideration of vehicle performance & reliability.
7. All rentals require a signed support contract and deposit.
